---

This video is to welcome those of you that come to our home page for the first time in search of a great free online game, so that you can get a taste for what awaits you when you finish downloading Tribes 1 from our download section and start playing. And is also a toast to you returning players after being gone from the game for so long, but not long enough to forget perhaps one of the fullest experiences in your gaming life. Maybe you would like to take a turn on memory lane and download it again, sense Garage Games made a new version of it (Tribes 1.40). Maybe you'll stick around. Sure, it has old graphics, but our small but die hard community is working hard at new skins, textures and terrains in High Quality, preserving the original appearance of the Dynamix(c) work from 1998, as well as many variations of the standard hud to give the game a newer look. All for the love of the game. Whether you are new or a returning player, please let us know through our forums if there is anything we can help you with to get you set up. We are also working on adding more Tribes 1 resources and references so that you have all you need to develop or rediscover this great game. Have fun! The Oldest Clan In Tribes
